More Employable Graduates

96%
Chief Academic Officers
In a recent study, 96% of Chief Academic Officers said their institution was doing a good job preparing students for the workforce.

33%
Business Leaders
During this study, only 33% of business leaders agreed that graduates had the necessary skills and competencies to succeed in the workplace.

What's missing from your curriculum?

SkillsEngine

Calibrate

Teach what matters

If curriculum doesn't connect to the world of work, neither will your students. Calibrate gives you the ability to discover what's missing and translate your curriculum into valuable skills that employers need.

Expedite curriculum development

Prepare your students for success without drowning in curriculum development. Calibrate Blueprints jump-start the job analysis and review process so you can spend more time focusing on the job that you love — teaching.

Clarify skill requirements

Employers need qualified graduates. Educators want successful students. Finally, everyone can agree on what graduates need with Calibrate Profiles. Simplify the conversation with customized skills data and helpful context.

Validate with industry partners

Keeping curriculum relevant is a long, manual and expensive task. Calibrate simplifies and expedites this process to get validation from industry partners.

Data that's always improving

Skill requirements are constantly changing. Get better suggestions and more-relevant insights over time. Stay on top of emerging trends with ongoing updates to our library and Blueprints.
